WHERE? WHAT? HOW IN THE WORLD?

UNDERSTANDING CRISES

ReddyToRumble

CONTEXT

PROBLEM

UN humanitarian project funding suboptimally allocated

SOLUTION

Signal aggregation
Intuitive dashboard
Explainable results

FOR WHO?

Non-technical decision makers and aid coordinators

WHY?

Better data aggregation and communication needed

UNDERLYING SIGNALS

FUNDING RATIO/GAP

Funding received vs funding needed

FUNDING TRAJECTORY

Historical funding data

REQUIREMENT TREND

Overall direction of project funding

Humanitarian Concerns

5 key areas of support needed

CBPF COVERAGE

Pooled funding at country level

FUNDING ASSESSMENT

Results distilled into qualitative categories

Recognising flaws in underlying data, and subjective nature of crisis assessment, crises sorted into general buckets.

- **Critically underfunded**
- **Significantly underfunded**
- **Likely underfunded**
- **Some funding gaps**
- **Adequately funded**

Afghanistan

CORE IMPACT SUMMARY

ASSESSMENT

Critically Underfunded

Declining funding trend | Severe education deprivation | Very large impacted population

PEOPLE IN NEED	FUNDING RATIO
21,889,283	12.5%

AI CRISIS INSIGHTS

The Afghanistan Humanitarian Needs and Response Plan 2026 is assessed as **Critically Underfunded** because it has received only $214.2 million of its $1.71 billion requirement — a mere 12.5% funding rate — leaving over 21.8 million people in need without adequate support. This dire shortfall is compounded by a declining funding trend that signals worsening donor disengagement over time, while severe education deprivation affecting the population indicates that critical long-term recovery sectors remain chronically neglected. The sheer scale of the impacted population further stretches the limited available resources to a breaking point, making meaningful humanitarian response across Afghanistan virtually impossible without a dramatic and urgent increase in international financial commitment.

GRANULAR METRICS & INTELLIGENCE

Funding Required	$1,714,181,496
